

# MoreVMs'20

24th March 2020

Co-located with <Programming>'20 in Porto, Portugal

Bringing together industrial and academic programmers to discuss the design, implementation, and usage of modern languages and runtimes.

*Extensible VM design*

*Reusable components*

*Static and dynamic compilation techniques*

*Interoperability between languages*

*Tooling support*

*Development environments*

*Case studies*

*Challenges and trade-offs*

*Language performance*

*Hardware support for languages*

Call for short abstracts and talk proposals live at:
